

CosmoVerse@Istanbul 2025

Tuesday 24 June 2025

Afternoon session 2: (Tuesday) (16:15 - 17:30)

-Conveners: Mariam Bouhmadi-López

time	[id] title	presenter
16:15	[30] The present and the future of quasars in cosmology	LUSSO, Elisabeta
16:40	[40] GRB Redshift Estimation using Machine Learning and the Associated Web-App	DAINOTTI, Maria Giovanna
17:05	[64] Future measurements of S8 with tomographic cross-correlations between LSST and CMB experiments	SARAF, Chandra Shekhar

Wednesday 25 June 2025

Afternoon session 2: (Wednesday) (15:45 - 17:25)

-Conveners: Agnieszka Pollo

time	[id] title	presenter
15:45	[43] Cosmic Dipole Tensions: Confronting Planck, NVSS, RACS and CatWISE	LAND-STRYKOWSKI, Mali
16:10	[80] Confronting the cosmic dipole tension	OAYDA, Oliver
16:35	[120] CMB Lensing Imprints of Cosmic Voids: A test of Λ CDM	DEMIRBOZAN, Umut Emek
17:00	[41] A low-redshift preference for an interacting dark energy model	ZHAI, Yuejia

Thursday 26 June 2025

Afternoon session 2: (Thursday) (15:45 - 17:00)

-Conveners: Nihan Katirci

time	[id] title	presenter
15:45	[110] The effective running Hubble parameter in SNe Ia as a marker for the dark energy nature	Ms FAZZARI, Elisa
16:10	[117] The Ph-LsCDM Model: Towards a Solution to the H0 tension Problem.	ZHUK, Alexander (Oleksandr)
16:35	[59] Primordial Black Holes, Charge, and Dark Matter: Rethinking Evaporation Limits	SANTIAGO, Jessica
